LUCAS HANG

Over the last 3 years I evolved a lot, starting with a technical programming course and today I'm a fullstack developer at Pedidos10, leading a development team.

Until today, what I have always looked for are challenges, learning new things and making all I can to do them well. Whether alone or in a team, watching classes or learning by practice with every mistake.

I consider myself a patient, focused and quick learner, I'm also currently developing my skills in people management.

I know I can bring more knowledge and also learn from my peers. I work to make the company's product more resilient, valued and safe.

WORK EXPERIENCE

-  Nov 2019 - Present **Full-stack Developer**
[Dev10 Soluções em software, Blumenau](#)
My first experience in the market, where I learned a lot so far and I'm still. During the first and second year I worked at the Delivery Marketplace app (Javascript, PHP, HTML, CSS, MySQL, AWS, Google Cloud, Angularjs), and developed the delivery men logistics app (React Native). At current moment I'm scrum master of the developer team, working in a new project for restaurants internal management (Node.js, Typescript, React, React native).

EDUCATION AND QUALIFICATIONS

-  Mar 2018 - Nov 2019 **Systems development technician**
[SENAI/SC - Serviço Nacional de Aprendizagem Industrial, Tijucas](#)
Here I had my second contact with development, this time a little deeper, going through all areas of information technology, programming logic, networks, database, documentation and agile methods. We worked mainly with Ruby and Java.
-  Jan 2018 - Nov 2018 **Industrial Learning of Support and Maintenance in Microcomputers and Networks**
[SENAI/SC - Serviço Nacional de Aprendizagem Industrial, São João Batista](#)
My first contact with programming and where I became interested in the area, here we went through the basics of the world of technology, at first with VisualG and later in the course with Java.
-  Jan 2017 - Nov 2019 **High school**
[E.E.B São João Batista, São João Batista](#)
