ABOUT ME

Over the years, my knowledge increased mostly in a self-taught way. At age 18 I had my first professional opportunity, two years focused in learning and evolution. At age 21 I became Scrum Master, a challenge that has proven to be fortuitous and has brought me closer to Leadership, which I intend to evolve from now on. A diversity of technologies and frameworks I learned, but more valuable than that, communication, responsibility and trust. I know I can bring more knowledge and also learn from my peers. I do so that the product I work on is resilient, valued and safe.

PROFISSIONAL EXPERIENCE

Full-stack Developer, 11/2019 - Atual
Dev10 Soluções Em Software - Blumenau, SC
I started supporting and making improvements in two internal web systems of the company, the first in PHP with Postgres and the second in Angularjs consuming an API in PHP. During the second year I worked on the development of a new desktop application made in Electron to control orders and printing them, at the same time expanding the company's logistics area, with a PHP system for management by operators and a mobile application with React Native used by delivery men to receive, track and finish order deliveries. Since the beginning of 2022 I have been working as Scrum Master for a team in a new company product for complete internal restaurant management, in addition to helping with development and technical or domain decisions.

EDUCATION

Technologist: Data Science, Esperado Em 2025
Descomplica Faculdade Digital - Remote

Systems Development And Maintenance Technician: Systems Development, 2019
SENAI/SC - Tijucas, SC
